Group Consolidation in **Power BI**

Advanced Group Reporting for Complex Telecom Structures

From multiple entities, currencies, ownership layers and intercompany transactions to one reliable consolidated group result.

MULTIPLE
ENTITIES

MULTI-
CURRENCIES

OWNERSHIP
LAYERS

INTERCOMPANY
TRANSACTIONS

CONSOLIDATED
GROUP RESULT

Why Group Consolidation Matters

Group consolidation is not only about adding numbers together.

In real business groups, reporting becomes complex because entities may have different ownership percentages, currencies, charts of accounts, acquisition dates, intercompany balances and investment relationships.

This course focuses on building a practical consolidation approach where Power BI is used to bring structure, transparency and control into the group reporting process.

COMPLEXITY
INTO CLARITY

STRUCTURE
FOR BETTER DECISIONS

TRANSPARENCY
ACROSS ENTITIES

CONTROL
FOR A STRONGER TOMORROW

Telecom Sector Consolidation Story

Many Entities. Different Operations.
One Consolidated Group View.

The course uses a realistic telecom-sector scenario with multiple connected business units, giving you practical exposure to a complex group structure.

*Different
Businesses
Connected
for a Stronger
Tomorrow*

Advanced Consolidation Topics

From Real-World Complexity to Practical Solutions

This course covers the key advanced areas of group consolidation, using a realistic telecom-sector scenario, and shows you how to implement them step by step in Power BI.

*Build Knowledge
Apply in Power BI
Gain Confidence*

Key Takeaways

Understand the Concepts

Clear and practical explanation of advanced topics

Apply in Power BI

Build a robust consolidation model step by step

Work with Real Scenarios

Based on a realistic telecom group structure

Develop Practical Skills

Using modern tools and best practices

Build Confidence

To handle complex group reporting requirements

Power BI Model & Practical Learning Output

The course builds a practical group consolidation model in Power BI, designed to handle complex group structures, advanced adjustments and transparent reporting outputs.

From Complex Data to Clear Group Insights

What You Build

A structured consolidation model

Clear adjustment logic

Reliable group reporting

Practical drilldown visibility

Confidence to apply in real work

Final Learning Outcome

The final output is not only a report. It is the knowledge, skill and confidence to design a structured group reporting model using modern finance and analytics tools.

Thank You

Group Consolidation in Power BI

From complex telecom group structures to one consolidated reporting view.

Build the mindset, model and reporting discipline required for advanced consolidation in Power BI.
